

Lakshmi Narasimhan

React Native Engineer, SDE II | TypeScript · iOS & Android · Node.js · Kotlin/Swift Native Modules | CI/CD · Performance · System Design

Chennai, India | stellarworks03@gmail.com | +91 8056297050 | github.com/lachu97 | linkedin.com/in/lakshminarasimhan-rn | leetcode.com/u/Lakshu1797/

SUMMARY

React Native engineer with 4 years of production mobile experience on Android and iOS, including apps at 100K+ installs. Focus on mobile performance (crash-free sessions, render optimization, memory profiling), native module development in Kotlin and Swift, and CI/CD with Fastlane and GitHub Actions. Published react-native-securekv on npm and built VectorDB, a self-hosted vector search project using pgvector. Also comfortable with the full stack: React, Node.js, FastAPI, PostgreSQL.

WORK EXPERIENCE

IntuitionX — SDE II — React Native & Full-Stack (Contract)

Remote

Mar 2026 – Present

- Building React Native features end-to-end across iOS and Android, integrated with a React web frontend and Node.js backend.
- Own CI/CD pipelines (Fastlane + GitHub Actions) for Play Store and TestFlight, including environment configs and rollback handling.
- Writing native module integrations in Kotlin (Android) and Swift (iOS); codebase uses strict TypeScript throughout.

Concentrix — SDE II — React Native, iOS & Android

Chennai

Oct 2024 – Jan 2026

- Built shared React Native infrastructure modules (networking, auth, theming) reused across 5+ apps, cutting duplicated code by around 60%.
- Reduced JS-thread interaction latency by ~35% through render optimization, memoization, and FlatList virtualization; profiled using Flipper and Hermes.
- Fixed memory leaks identified with Android Studio Profiler and Xcode Instruments, bringing OOM crashes down ~30% and crash-free sessions up to 99.8%.
- Set up Fastlane CI/CD with staged Play Store rollouts and CodePush OTA; cut release cycle time by around half. Handled crash triage via Crashlytics and shipped hotfixes under time pressure.
- Wrote native Kotlin (Android) and Swift (iOS) modules for features that couldn't be done in JS alone.

eShakti — SDE I — React Native, iOS & Android

Chennai

May 2023 – May 2024

- Worked on a React Native e-commerce app that grew to 100K+ installs on Android and iOS (US market). Improved startup time by ~25% and rendering on mid/low-tier devices.
- Shipped JS fixes via CodePush OTA without store resubmission, cutting resolution time from days to hours. Managed Play Store and TestFlight releases with Fastlane.
- Ran A/B tests and beta releases to validate feature changes before full rollout.

Foodhub — Software Engineer — React Native

Chennai

Jul 2022 – Mar 2023

- Reduced cold-start time by ~30% through bundle splitting, lazy loading, and image optimization on an app with 50K+ users.
- Built media upload and sync workflows for low-end devices using AWS S3 and Firebase Cloud Functions.
- Automated Play Store and TestFlight releases with Fastlane; used CodePush for OTA updates.

Colan Infotech — Android/iOS Developer Intern

Chennai | Sep 2020 – Jun 2022

PROJECTS

VectorDB — Self-Hosted Vector Search

github.com/lachu97/vector-db | Apr 2026 – Present

- Building a self-hosted vector database with multi-tenant support, REST APIs, auth, rate limiting, and a RAG pipeline. Search runs at sub-0.6ms p95 via pgvector HNSW indexing.
- Stack: Python, FastAPI, PostgreSQL, pgvector, SQLAlchemy, React, Redux Toolkit, Docker.

react-native-securekv — Open-Source NPM Package

npmjs.com/package/react-native-securekv | 2024

- Encrypted key-value storage for React Native, backed by Android Keystore and iOS Keychain. Published on npm, used for secure token storage in production apps.

DigiSlides — React Native Digital Signage CMS

Google Play | 2023

- React Native mobile CMS + Android TV app with remote content sync and media playback, built for multi-device digital signage.

SKILLS

Languages: JavaScript, TypeScript, Python, Kotlin, Swift, SQL

Mobile & Frontend: React Native, React, Redux Toolkit, React Query, Zustand, Reanimated, React Navigation, Hermes, MMKV, Flipper, Metro, Tailwind CSS

Backend & APIs: Node.js, FastAPI, REST APIs, GraphQL, WebSockets, SQLAlchemy

Databases: PostgreSQL, pgvector, Firebase, AWS S3

CI/CD & DevOps: GitHub Actions, Fastlane, Docker, CodePush, AppCenter, Gradle, CocoaPods

Testing & Observability: Jest, Detox, React Testing Library, XCTest, JUnit, Crashlytics, Sentry

Architecture: System Design, Distributed Systems, Multi-tenancy, Performance Optimization, Database Design, Caching, Rate Limiting

EDUCATION

B.Tech + M.Tech, Computer Engineering	2015 – 2020
Indian Institute of Information Technology, Design and Manufacturing — Kancheepuram
